### Analysis of Credit Allowance and Loan Mix

The top portion of this page presents data regarding the allowance for loan and lease financing receivables losses. The dollar figures provide a reconciliation of changes to the reserve from schedule RI-B, and the ratios are provided to highlight trends and permit assessment of the adequacy of the reserve.

The bottom portion of page 7 presents net loan losses by type of loan. For each type of loan, the charge off rate is annualized. Negative values for those ratios indicate net recoveries.

Page 7 A presents a detailed analysis of the loan portfolio mix.

## Analysis of Past-Due, Nonaccrual, and Restructured Loans and Leases

These pages analyze non-current debt, consisting of loans and leases in past-due or nonaccrual status, including those that had been restructured; and current restructured debt, consisting of loans and leases that have been restructured and are in compliance with modified terms. Loans are grouped by type of loan, however reporting differences require special treatment of non-current loan ratios for banks filing call form 033 and 034 prior to March 31, 2001. **From March 31, 2001 forward all banks file past due loan information using the same set of standards.**

### *Ratio Calculation For Banks Filing FFIEC 031 and 032 Prior to March 31, 2001*

The loan and lease categories used under this heading correspond to the categories used in report of condition RC-N and RC-C. For each category the percentage is determined by dividing the end-of-period non-current loan and lease figure by the corresponding loan figure from RC-C.

### *Ratio Calculation For Banks Filing FFIEC 033 and 034 Prior to March 31, 2001*

Prior to March 31, 2001 Banks filing call forms 033 and 034 are permitted to categorize loans using their own internal system for schedules RC-N and RC-K but not for schedule RC-C. For consistency in definition, non current loan and lease ratios use non-current loan information from RC-N and outstanding loan data from RC-K. Analysis of these data should be made in conjunction with analysis of other information on loans and leases provided in this report.

Each category displays loans 90 plus days past due, loans on non-accrual, total non-current and loans 30-89 days past due.

An additional section displays other pertinent ratios including other analyses of past due and restructured loans by type that are current by their revised terms.

### **Interest Rate Risk Analysis**

This page presents information that may be used to assess the interest rate risk inherent in a bank's balance sheet. Most of the underlying repricing data is reported in the memorandum sections of RC-B, RC-C, RC-E as well as on RC. The analysis emphasizes the long side of the balance sheet and also takes into account the impact of non-maturity deposits. Most ratios are presented as a percent of total assets.
